PROFILE

Full-stack engineer with 2+ years building **AI-powered products end to end** — from client requirements to production. Shipped voice and speech-AI systems for enterprise healthcare clients, a travel app with **100,000+ downloads**, and an AI product that reached **#2 on Product Hunt**. Promoted junior → medior in under two years across projects with very different stacks and business domains. Comfortable working close to clients, turning vague requirements into working software fast, and owning features from API design through to deployment.

TECHNICAL SKILLS

Languages TypeScript · JavaScript (ES6+) · Python (learning)

Frontend React · Next.js · Angular · React Native · HTML · CSS · TailwindCSS · Figma-to-code

Backend NestJS · Node.js · REST API design · MongoDB · Firebase · Stripe

AI / LLM Claude API · LLM app integration · prompt engineering · AI chat interfaces · speech & voice tech

Cloud & Tools Azure · AWS · Vercel · Git / GitHub · Cursor · Shopify (Liquid)

Ways of working Client-facing delivery · rapid prototyping · code review · agile teams · EN/HU bilingual

PROFESSIONAL EXPERIENCE

BLCKS Software Kft. · Budapest · award-winning software agency (Clutch Top 100 HU, 2025 & 2026)

Full-Stack Software Engineer (Junior → Medior) Oct 2024 – Jul 2026

- **Built AI voice and speech-technology solutions** for enterprise healthcare and service clients (SYNLAB, RMC, Xmed360), covering backend integration and client-facing interfaces in Angular, NestJS and Azure.
- **Developed Flinkit**, an AI-based outdoor team-building product that reached **#2 in Product Hunt's daily ranking** — delivered from concept to public launch.
- **Shipped production features for Wingman**, a travel application with **100,000+ downloads**, working within an existing large-scale codebase and live user base.
- **Delivered full-stack features for Propertizer**, an award-winning proptech platform, under frequently changing business requirements.
- Moved between five client projects with different stacks and domains, picking up new frameworks in days and translating client and business needs directly into technical decisions — recognised with an early promotion to medior.

Freelance / Independent · Budapest

Full-Stack Software Engineer Feb 2024 – Present

- **Delivered complete web applications as sole developer** — API design, data modelling, frontend and production deployment (React, TypeScript, Next.js, MongoDB, Firebase, Stripe, Vercel).
- Built admin dashboards with full CRUD, payment flows and content management for revenue-generating products.
- Implemented frontends for AI platforms: REST API integrations and AI chat interfaces built from Figma designs.
- Run a live bilingual (HU/EN) Shopify storefront end to end, and shipped React Native mobile features after self-teaching the framework in weeks.

CERTIFICATIONS & TRAINING

Udemy — 8 completed certifications in full-stack web development

The Complete Full-Stack Web Development Bootcamp · Dr. Angela Yu [Certificate](#)

React – The Complete Guide (incl. Next.js, Redux) · Maximilian Schwarzmüller [Certificate](#)
